

SUPER MOTO TT

Welcome to the SupermotoTT Home Page, a place to find information on America's growing SupermotoTT race scene. SupermotoTT (otherwise known as Supermotard or Supermoto in Europe) is an exciting form of motorcycle racing that combines the high-speed grace of pavement road racing with the action packed drama of TT-style dirt track racing. This type of motorcycle competition will be familiar to those who may recall the ABC Wide World of Sports Superbikers events run at Southern California's Carlsbad Raceway during the late 1970s thru the mid 80s. While the ABC Superbikers provided some epic showdowns between road race, dirt track and motocross heroes, it was a made-for-television event contested exclusively by top-level professional riders. From the very beginning, my vision for SupermotoTT has been to create a racing series that allows amateur and professional riders to compete. SupermotoTT presents an affordable means for a broad range of riders to experience the thrill of fast paced motorcycle competition.
